Engineering Services Program / MC 103-3A 333 Guadalupe Street P.O. Box 149104 Austin, Texas 78714-9104 Phone No. (512) 322-2212 Fax No. (512) 463-6693

PRODUCT EVALUATION

SK-34

The following product has been evaluated for compliance with the wind loads specified in the **International Residential Code** (**IRC**) and the **International Building Code** (**IBC**). This product shall be subject to reevaluation **December 2014**.

This product evaluation is not an endorsement of this product or a recommendation that this product be used. The Texas Department of Insurance has not authorized the use of any information contained in the product evaluation for advertising, or other commercial or promotional purpose.

This product evaluation is intended for use by those individuals who are following the design wind load criteria in Chapter 3 of the IRC and Section 1609 of the IBC. The design loads determined for the building or structure shall not exceed the design load rating specified for the products shown in the limitations section of this product evaluation. This product evaluation does not relieve a Texas licensed engineer of his responsibilities as outlined in the Texas Insurance Code, the Texas Administrative Code, and the Texas Engineering Practice Act.

Skytube Tubular Skylights "ST" Series, Impact Resistant, manufactured by:

ODL, Inc. 215 E. Roosevelt Ave. Zeeland, MI 49464 Telephone: (616) 748-5437

and distributed by

Wasco Products, Inc. 85 Spencer Dr. Wells, ME 04090

Telephone: (800) 338-0293

will be acceptable in designated catastrophe areas along the Texas Gulf Coast when installed in accordance with the manufacturer's installation instructions, the design drawings specified in this evaluation report, and this product evaluation report.

PRODUCT DESCRIPTION

The Skytube Tubular Skylights "ST" Series are skylights with a polycarbonate dome with an aluminum flashing. The tubular skylights specified in this evaluation report are impact resistant skylights. This product evaluation report is for tubular skylights based on the following tested constructions:

General Description:

System	Description	Label Rating
1	ST10HR; ST14HR	R-PG100 (14) Diameter – Type TDD

Product Dimensions:

System	Dome Size	Flashing Size
1	14" x 7-3/16"	26" diameter x 6" high

Effective Date: July 1, 2012

Glazing Description:

System	Glass Construction ¹	Glazing Method ²
1	SG-1	GM-1

Note: ¹ See the "Glass Construction Key" for the glazing construction.

Glass Construction Key:

SG-1: The skylight utilizes a nominal 0.115" thick molded polycarbonate dome. The polycarbonate dome utilizes light diffusers in its construction.

Glass Method Key:

GM-1 The dome is sealed to the flashing with a 0.472° wide by 0.394° thick closed cell gasket. The dome is secured to the flashing with four equally spaced no. 8 x $\frac{3}{4}^{\circ}$ screws and self-sealing washers.

Flashing: The flashing is constructed of 0.065" thick aluminum.

Glass Diffuser Lens Assembly Construction: The assembly is constructed of a plastic ceiling ring that is secured to the ceiling with four screws with flip tabs. The face of the plastic ceiling ring against the ceiling utilizes a layer of foam gasket tape along the outer perimeter. The inner perimeter, where the reflective adjustable tube is located, and the inner perimeter of the opposite face of the ceiling ring, where the glass diffuser is located, utilize kerf-mounted hollow bulb seals. Tape is applied to the same surface at three locations to seal three holes through the ceiling ring. The tempered glass diffuser lens is set against a plastic trim piece with two glass lenses on top of the diffuser.

Product Identification: A certification program label (Keystone Certification Program) will be attached to the skylight. The certification program label includes the product name; performance characteristics; and approved inspection agency (Keystone) to indicate compliance with the requirements of AAMA/WDMA/CSA 101/I.S.2/A440-08 and ASTM E 1886 and ASTM E 1996. The certification program contains two Certification Authorization Report (CAR) numbers located on the right side of the label. The following CAR numbers and model names are located on the label:

Label Identification:

System	Model	Certification Authorization Report (CAR) Numbers
1	ST10HR; ST14HR	152-112 or 152-203

Impact Resistance: These skylight assemblies satisfy the Texas Department of Insurance's criteria for protection from windborne debris in both the **Inland I zone** and the **Seaward zone**. These skylight assemblies passed Missile Level D specified in ASTM E 1996-05. The skylight assemblies may be installed at any height on the structure as long as the design pressure rating for the assemblies is not exceeded. These skylight assemblies will not need to be protected with an impact protective system.

Acceptance of Smaller Assemblies: Skylight assemblies with dimensions equal to our smaller than those specified in this evaluation report are acceptable within the limitations specified in this report.

LIMITATIONS

Design Pressures:

System	Dome Size	Design Pressures (psf)
1	14" x 7 3/16"	± 100

² See the "Glazing Method Key" for the glazing method description.

INSTALLATION INSTRUCTIONS

General: The skylight assembly shall be prepared and installed in accordance with the manufacturer's recommended installation instruction, the approved drawings referenced below, and this evaluation report. Detailed installation instructions and component drawings are available from the manufacturer.

Design Drawings: The skylights shall be installed in accordance with Drawing No. TX-4135, titled "Skytube Tubular Skylight," sheets 1 through 2 of 2, dated November 9, 2011, signed and sealed by Lyndon F. Schmidt, P.E. on December 8, 2011. The stated drawings will be referred to as the approved drawings in this evaluation report.

Roof Deck Construction: The skylights shall be secured to a minimum 7/16" thick OSB.

Installation: The skylights shall be installed as specified on the approved drawings.

Note: The manufacturer's installation instructions and the approve drawings shall be available on the job site during installation. All fasteners shall be corrosion resistant as specified in the International Residential Code (IRC), the International Building Code (IBC), and the Texas Revisions.
